Press seals for cables

Sustainable solutions for your electrical infrastructure

Standard Press Seals with segmented ring technology

Press seal for sealing cables in drill holes or wall sleeves.

Features and technical data

- gas-tight and watertight up to 2.5 bar
- split seal for retrofit installation
- segmented ring technology – individually adjustable to installed cable diameters on site
- sealing width 40 mm
- EPDM rubber
- press plates made of stainless steel A2 (AISI 304) or A4 (AISI 316)
