

# Renovation wall sleeve

SFR200/1000

: 930000260, GTIN: 4052487025485

For retrofit installation in brickwork or concrete walls.

## Advantages:

- Can be cut to length on site
- Compact design accommodates smallest possible drill holes/break-throughs

## Dimensions:

- Wall thickness: 4, 5 and 6 mm

## Properties:

- Roughened surface for connection to wall
- Break-resistant, inherently stable
- For retrofit installation in break-throughs

## Application range:

- Waterproof concrete stress class 1, waterproof concrete stress class 2

## Material:

- Pipe: PVC-U

|                           |      |
|---------------------------|------|
| Wall sleeve Øi (mm):      | 200  |
| Wall sleeve OD (mm):      | 214  |
| Minimum drilling<br>(mm): | 300  |
| Length (mm):              | 1000 |
