

# **Outer sealing element module 6**

for single-line building entry systems basic variant 1

## ESH PolySafe M6

: 1900400020, GTIN: 4052487051026

For sealing in core drills for double walls/element walls. With a sealing width of 80 mm, module 6 is able to seal both the concrete formwork of the double wall/element wall and the in-situ concrete. This prevents rising water in the area between the element wall and the concrete filling from penetrating the core drill hole.

### **Advantages:**

• quick and easy installation

### **Dimensions:**

• Core drill/wall sleeve ID: 99 - 103 mm

• Sealing width: 80 mm

## **Application range:**

• Waterproof concrete stress class 1, waterproof concrete stress class 2
