

# Bellmouth Wall Sleeve

for setting in concrete

## BWS100/110

: 827030100, GTIN: 4052487196024

- **Frame connection system for creation of packages on site – compatible with all three sizes**
- **Easy adjustment to the wall thickness on site – using available cable ducts**

For installation flush with the formwork and use of standard press seals.

### Advantages:

- Integrated bellmouth shape protects the cables from damage
- Blind plate for pressure tight seal immediately after concreting
- Trisection division of the blind plate for easy breaking through
- Patch flange for processing polymer modified bituminous thick coatings

### Properties:

- Middle flange serves as water barrier
- Lugs for secure fastening to the reinforcement with tie wire
- Nail lugs with break protection for attachment to the formwork

### Material:

- ABS

## Tightness:

- gastight and watertight to 1.0 bar, right after concreting
