

Foil sleeve

for entries through the floor slab

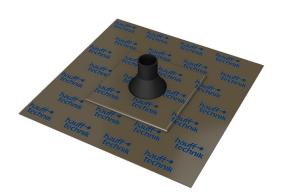

HFM 1x8-12

: 3030370204, GTIN: 4052487227988

 prevents convection and the resulting ingress of radon gas into the building

Hauff foil sleeve for secure connection of entries through the slab to a vapour barrier, radon foil or other sheet-type seal on the slab.

Advantages:

- quick and easy installation
- excellent adhesive strength

Application range:

- DIN 18533 W1-E
- Waterproof concrete stress class 1, waterproof concrete stress class 2

Material:

- Foil flange: Aluminium-plastic composite foil with butyl rubber
- Rubber insert: EPDM

Tightness:

- gastight
- radon tight

Number of cables/medium:

Area of application cable OD

(mm):

1 8-12

Size (mm):

150 x 150 mm
