

Foil sleeve

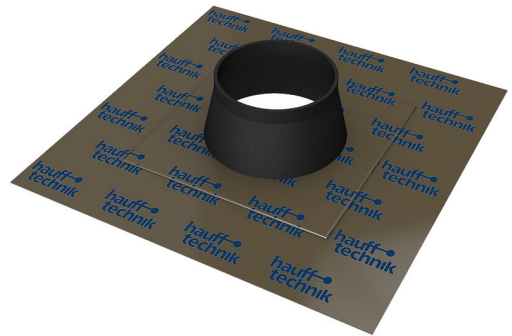

for entries through the floor slab

HFM 1x100-110

: 3030370212, GTIN: 4052487228053

- **easy integration of the vapour barrier or radon foil**
- **prevents convection and the resulting ingress of radon gas into the building**

Hauff foil sleeve for secure connection of entries through the slab to a vapour barrier, radon foil or other sheet-type seal on the slab.

Advantages:

- quick and easy installation
- excellent adhesive strength

Application range:

- DIN 18533 W1-E
- Waterproof concrete stress class 1, waterproof concrete stress class 2

Material:

- Foil flange: Aluminium-plastic composite foil with butyl rubber
- Rubber insert: EPDM

Tightness:

- gastight
- radon tight

Number of
cables/medium: 1

Size (mm): 320 x 320
mm
