

Earthing entry

HEA M12/250

Article no.: 1700020012, GTIN: 4052487136402

- **Patented anti-twist protection thanks to the special shape of the contact disc**

For installation flush with the formwork in waterproof concrete. Earthing connections can be made using the thread on both sides of the conductor core.

Picture may differ from selected product

FACTS

Advantages:

- Tested short-circuit current load
- Water barrier for tightness with concrete
- Watertight connection thread on both sides (blind hole)
- Resistant to corrosion

Scope of delivery:

- 2 pieces of protective covers with 4 nail holes

Dimensions:

- Conductor core: round, Ø 25 mm
- Contact washer: Ø 72 mm
- For wall thicknesses: > 70 mm

Application range:

- Waterproof concrete stress class 1 and 2

Material:

- Conductor core and contact washers: stainless steel V4A (AISI 316L)
- Water barrier: NBR
- Protective covers: PE

Tests/Standards:

- DIN 18014
- DIN EN 62305-3
- VDE 0185-305-3 (with lightning protection application)

FEATURES

Threaded bolt:	M12
Wall thickness (mm):	250
