

Earthing fixed point with cross-clamp

HEA P M12

Article no.: 1700100010, GTIN: 4052487044745

- **Patented anti-twist protection thanks to the special shape of the contact disc**

For earthing connection using the cross clamp, for installation flush with the formwork. An earthing connection can be made using the thread in the conductor core.

Picture may differ from selected product

FACTS

Advantages:

- Connection of flat and round conductors in concrete
- M12/M16 connecting threads (blind hole)
- Watertight connection thread (blind hole)
- Resistant to corrosion

Scope of delivery:

- 1 piece of protective cover with 4 nail holes

Dimensions:

- Conductor core: round, Ø 25 mm
- Contact washer: Ø 72 mm
- Distance between contact washer and cross-clamp: 120 mm

Application range:

- Waterproof concrete stress class 1 and 2

Material:

- Conductor core and contact washers: stainless steel V4A (AISI 316L)
- Cross clamp 70 x 70 mm with threaded bolt: St37 galvanised
- Protective covers: PE

Tests/Standards:

- To DIN 18014
- DIN EN 62305-3
- VDE 0185-305-3 (with lightning protection application)

FEATURES

Threaded
bolt: M12
