

Outer sealing element module 6

for multi-line building entry system MSH PolySafe GV 1 and GV 2

MSH PolySafe M6

Article no.: 1560000107, GTIN: 4052487162807

- **visual installation reliability due to built-in inspection opening**

Outer sealing element to supplement the multi-line building entry PolySafe in core drill holes in double/element walls. The sealing width of 90 mm provides a seal against both the concrete shells of the double/element wall and the pre-mixed concrete filling. This prevents rising water in the area between the element wall and the concrete filling from penetrating the core drill hole.

FACTS

Advantages:

- Highly reliable thanks to sealing width of 90 mm
- Can be combined with outer flange MSH PolySafe M2

Dimensions:

- Compatible with core drill/wall sleeve: ID: 199 - 203 mm
- Sealing width: 90 mm
- Insertion depth: 115 mm

Application range:

- Waterproof concrete stress class 1 and 2

Material:

- Glass fibre reinforced polyamide/EPDM/stainless steel V2A (AISI 304L)
