

Outer sealing element module 1.2

for single-line building entry systems basic variant 1

ESH PolySafe M1.2

Article no.: 1910000104, GTIN: 4052487162876

- **tested according to DIN 18533**

Rubber compression seal with overlying flange for integration in existing damp-proofing in buildings with cellar.

Picture may differ from selected product

FACTS

Advantages:

- Quick and easy installation
- Integration of existing building seals to DIN 18195 Part 4

Dimensions:

- Core drill/wall sleeve ID: 99 - 103 mm
- Outer diameter of flange: 160 mm
- Sealing width: 40 mm

Application range:

- Water exposure class DIN 18533: W1-E and W2.1-E
- Waterproof concrete stress class 1 and 2

Material:

- Rubber: EPDM
- Flange: stainless steel V2A (AISI 304L)
- Flange seal: foam rubber/NBR
- Press plates: stainless steel V2A (AISI 304L)
- Screws and washers: stainless steel V2A (AISI 304L)
