

Earthing entry

HEA M12/150

: 1700010150, GTIN: 4052487044509

- **Patented twist resistance provided by special contour of contact washer**

For installation flush with the formwork in waterproof concrete. Earthing connections can be made with the thread on both sides in the conductor core.

Advantages:

- Tested short-circuit current load
- Water barrier for tightness with concrete
- Watertight connection thread on both sides (blind hole)
- Resistant to corrosion

Scope of delivery:

- 2 pieces Protective covers with 4 nail holes

Dimensions:

- Conductor core: round, Ø 25 mm
- Contact washer: Ø 72 mm
- For wall thicknesses: > 70 mm

Application range:

- Waterproof concrete stress class 1, waterproof concrete stress class 2

Material:

- Conductor core and contact washers: stainless steel V4A (AISI 316L)
- Water barrier: NBR
- Protective covers: PE

Tests/Standards:

- DIN 18014
- DIN EN 62305-3
- VDE 0185-305-3 (with lightning protection application)

Threaded bolt: M12
wall thickness
(mm): 150
