

Bellmouth Wall Sleeve

for setting in concrete

BWS150/160

: 827030150, GTIN: 4052487196031

- Frame connection system for creation of packages on site compatible with all three sizes
 - Easy adjustment to the wall thickness on site – using available cable ducts

For installation flush with the formwork and use of standard press seals.

Advantages:

- Integrated bellmouth shape protects the cables from damage
- Blind plate for pressure tight seal immediately after concreting
- Trisection division of the blind plate for easy breaking through
- Patch flange for processing polymer modified bituminous thick coatings

Properties:

- Middle flange serves as water barrier
- Lugs for secure fastening to the reinforcement with tie wire
- Nail lugs with break protection for attachment to the formwork

Material:

ABS

Tightness:

• gastight and watertight to 1.0 bar, right after concreting

D1 (mm): 150 (mm): 160 (mm): 250 (mm): D4 (mm):
