

# **Outer sealing element module 1.2**

for single-line building entry systems basic variant 1

# ESH PolySafe M1.2

Article no.: 1910000104, GTIN: 4052487162876

Rubber compression seal with overlying flange for integration in existing damp-proofing in buildings with cellar.

Picture may differ from selected product

## **FACTS**

### **Advantages:**

- Can be installed easily and quickly on-site
- Integration of existing building seals to DIN 18195 Part 4

#### **Dimensions:**

- Core drill/wall sleeve ID: 99 103 mm
- Outer diameter of flange: 160 mm
- Sealing width: 40 mm

### **Application range:**

- DIN 18533 W1-E, DIN 18533 W2.1-E
- Waterproof concrete stress class 1, waterproof concrete stress class 2

#### **Material:**

- Rubber: EPDM
- Flange: stainless steel V2A (AISI 304L)
- Flange seal: foam rubber/NBR
- Press plates: stainless steel V2A (AISI 304L)
- Screws and washers: stainless steel V2A (AISI 304L)
